WHAT WE OFFER

Eastland Feed and Grain, Inc. in Shannon is both a mill and grain elevator and can meet any of your grain or feed needs. We also provide commodity brokerage to support your personal hedge account. We understand hedging, basis, spreads, and freight. We are comfortable working with producers of any size with a variety of needs.

Area 51 in Savanna offers grain bin space for corn, beans, and wheat; as well as helping you with your marketing needs.

Miller's Mill in Chadwick offers feed and farm supplies to customers.

Eastland Commodities in Platteville provides assistance with marketing, hedging, and trading services as well as finding the best market for your grain.

The **Honey Creek Feed Mill** in Monroe, WI is our newest feed mill and feeds the livestock base of Southern Wisconsin.

SISTER COMPANIES

We also have a repair shop located in Lanark called **Eastland Fabrication**. This operation offers fabrication, welding, and repair of any and all farm equipment, grain trailers, and truck tarp installation. As well as serving commercial and industrial customers.

In 2015, Eastland Fabrication expanded into sales and service of Houle and Nuhn manure handling equipment, Ag Spray equipment, and Schulte mowers; as well as many other product lines, parts, and accessories. Also located in Lanark, this entity is **E and S Equipment**.

SHANNON

Eastland Feed and Grain, Inc.

Who We Are

Since starting Eastland Feed and Grain, Inc. in 1990, the Coulthard family has expanded their business every year. There are now five locations including Shannon (feed and grain), Savanna (grain), Chadwick (feed), Platteville, WI (brokerage and grain marketing), and our newest addition - Monroe, WI (feed mill). As a result of our numerous expansions, we have grown to become a modern mill and grain elevator; serving the tri-state region in Illinois, Iowa, and Wisconsin.

We have effectively increased our capacity for ingredients, manufacturing, and delivery every year since we opened the doors. We currently have 2,700,000 bushels of grain storage as well as a complete line of feed milling equipment and the trucks to deliver the finished product.

Our most recent additions include a commodity shed, robotic bag line, and truck wash bay. These have helped us lower costs and improve labor efficiency while also improving biosecurity.

We started as a small family operation, and it is still a family operation, just a larger family!

We are always going, always growing, always
"Helping Farmers Feed the World"
We are Eastland Feed and Grain, Inc.

SHANNON FEED MILL CAPABILITIES

- Two Pair Roller Mills
- Three Pair Roller Mills

COMBINED OPERATIONS

- 3200 tons of ingredients
- Over 200 ingredients inventoried
- 1200 ton per day milling capacity

FEED DIVISION EMPLOYEE CREDENTIALS AND DUTIES

The Eastland Feed team puts in the effort to ensure that your livestock are being given specialized nutrition that is precise for your operation. They also focus on the technical side of an operation, which helps maximize management and profitability.

Lyle Greenfield- Lyle grew up on a farm just south of Shannon, IL. near Harper, IL. His father milked cows, farrowed pigs, fed cattle and marketed grain. It was a family farm in every sense. Lyle, along with his siblings, were actively involved in helping their parents with daily responsibilities. It was a great education – teaching the value of work and how to care for animals. Lyle has a BA degree in Mathematics with a minor in Chemistry. He lives in Rockford, IL with his wife, Jeanne. Lyle has worked in the feed industry for 40 years.

Kelly Flack, MS- After interning with Eastland in 2005, Kelly got her Master's Degree from the University of Wisconsin-Madison. She became a full-time employee in 2009 and developed a love for working with calves and heifers. She also enjoys working with dairy and beef cattle. She grew up on a diversified farm with dairy, beef, hogs and crops; and currently lives on a diversified operation with her husband and kids. Her territory is located in parts of Carroll, Jo Daviess, Stephenson, and Green Counties, as well as the state of Iowa. She is known for her customer service and reliability.

Bree Lietzow- Bree grew up in North Central WI on a 100 cow dairy farm. She obtained her Bachelor's Degree in Animal Science from the University of Wisconsin-Madison. She has been with Eastland since 2015. She works with clients in Northwest IL and Southwest WI. Her primary expertise is dealing with dairy nutrition, followed by beef operations.

TECHNICAL SERVICES OFFERED

In order to meet your specific needs, we offer custom-formulated feed products manufactured in our mills.

Forage Analysis: We currently use Rock River Labs and Dairyland labs for forage and grain testing.

TMR Analysis: Penn State Shaker box, sample send in and TMR audits available.

Industry Support: We offer a wide variety of experts in several fields that fit your operation's needs for in-depth analysis or troubleshooting.

Nutrition Consultation: We conduct farm visits which include herd walk thru's, farm record evaluation, SOP set-up, troubleshooting, economics and more. This allows us to make effective and economical recommendations for your current needs. We provide diets based on your operation's needs which also includes custom complete feeds, minerals, and protein mixes.

Inventory Management: We gather all the data for projected herd size going into a new crop year to aid in making decisions for harvesting.

Grain Bank: We provide low-cost grain inventory storage for your grain bank corn or beans.

Inoculants: We inventory and provide service on the CHR Hansen line. We regularly use Biomax Pro and SiloSolve FC; also products, like SiloSolve OS, for topical applications on bunkers. Offering full-tech support from ourselves and the CHR Hansen corporation goes beyond just selling the inoculant, but also looking at forage quality, equipment set-up, and troubleshooting forage issues. We believe in helping producers make better quality forage so they can get more out of what they have on their own farm.
